

BRIEFING INVITATION

**ROBOTICS ROADMAP 2.0**

Wednesday, March 20, 8:30 AM – 10:00 AM  
122 Cannon House Office Building

Please RSVP to Bernadette Concepcion at  
b.concepcion@ieee.org or (202) 530-8365.

Coffee, tea and pastries will be served.

Dear Congressional Staff and Guests:

You are cordially invited to the unveiling of the Robotics 2.0 Roadmap, hosted by the Robotics Caucus Advisory Committee.

Building on the highly successful initial Robotics Roadmap that inspired the National Robotics Initiative, Robotics Roadmap 2.0 outlines a path for continued U.S. leadership in research to develop new applications to revitalize U.S. manufacturing and transform health care.

This briefing will feature fascinating presentations from three of America's leading robotics firms that are bringing new and exciting breakthroughs in robotics innovation to the market. It will also highlight the potential these innovations hold to create new markets and industries, which lead to new job creation, and the critical importance of maintaining this research pipeline to U.S. innovation.

The Robotics Roadmap 2.0 will be presented by **Dr. Henrik Christensen**, one of America's leading robotics researchers at Georgia Tech, followed by presentations from:

- Manufacturing: **Rodney Brooks**, Rethink Robotics Maker of Baxter, The factory floor co-worker robot that learns.
- Logistics: **Pete Wurman**, KIVA Systems The reason Amazon and Zappos can ship your order so soon.
- Healthcare: **Russ Angold**, Ekso Bionics A leader in exoskeleton development, helping the paralyzed walk again.

Event details will also be available shortly at <http://www.roboticscaucus.org/>

Thank you!
